

CARING FOR YOUR NEW STUDIO FULL ACCESS CABINET PRODUCTS

Congratulations! We know you have a choice in selecting kitchen cabinetry and appreciate your interest in our brand. With proper care, your Studio Full Access products will deliver years of beauty, enjoyment, and convenience.

This Studio Full Access Care Guide will assist you in choosing the correct products to protect your cabinets from normal wear and to repair any imperfections if they should occur.

- Clean cabinets as needed using a lint-free cloth dampened with warm water. Dry well.
- Wipe up spills, splatters and water spots as they occur, keeping cabinets and countertop surfaces dry.
- Give special attention to areas near the sink and dishwasher that come in contact with moisture.

CLEANING PRODUCTS TO AVOID

- **Do not** use abrasive cleaners, scouring pads, or powdered cleaners. These materials may penetrate the cabinet finish allowing moisture to enter and cause deterioration. Do not use harsh chemicals such as ammonia and bleach.
- **Do not** use solvent- or petroleum-based products such as nail polish removers or paint thinners.
- **Do not** wax your cabinets. Over time, wax may build up and cause a discolored appearance.
- **Do not** use pre-moistened dusting sheets or aerosol products specified for dusting.

REMEDIES FOR COMMON KITCHEN ACCIDENTS

Most problems can be prevented by wiping up any spills as soon as they occur. Follow these first aid suggestions for common household accidents. When removing a spot begin at the outer edge and work toward the middle to prevent the spot from spreading.

Food Spots/Water Spots

Clean cabinets as needed with a mild detergent or with soap and water (use sparingly) and dry well using a lint free cloth for both washing and drying.

Greasy Spots

Rub grease, lipstick, crayon, or oil with a damp cloth.

Chewing Gum/Candle Wax

Apply a plastic bag filled with ice on top of the deposit until it is brittle enough to crumble off.

Minor Scratches, Nicks, and Dents

Studio Full Access offers a **Cabinetry Care Kit** to help you keep your cabinet products looking like new. Most scratches, nicks, and dents can be repaired using this kit. The Cabinetry Care Kit includes (1) a touch-up marker to re-stain small scratches and (2) a putty stick to fill nail holes, minor nicks, and dents.

Both of these items can be ordered through the Advanta Cabinets customer service department.
